**В. Г. Шухова**

Кафедра программного обеспечения вычислительной техники и  
автоматизированных систем.

Лабораторная работа №2 по дисциплине  
«Технологии Web-программирования»  
Тема: Клиентское программирование. Vue.js

Выполнил:  
студент группы ПВ-41  
Колесников В.Д.  
Проверил: Поляков В.К.

Белгород 2019 г.

**Цель работы:** познакомиться с основами разработки на языке JavaScript. Познакомится с основами разработки frontend-приложений, в частности, с использованием клиентских фреймворков (Vue.js). Научиться переносить вёрстку в отдельные компоненты.

### Выполнение

Vue.js — это фреймворк для создания пользовательских интерфейсов. Его ядро в первую очередь решает задачи уровня представления (view), что упрощает интеграцию с другими библиотеками и существующими проектами. С другой стороны, Vue полностью подходит и для создания сложных одностраничных приложений (SPA, Single-Page Applications), если использовать его совместно с современными инструментами и дополнительными библиотеками.

Если рассматривать макет из лабораторной работы №1, то можно спокойно выделить карточки эмоций в один компонент, так как все карточки одинаковые, и передавать этим компонентам в качестве пропсов данные.

#### Home.vue

```
<template>
  <div class="home">
    <HomeHeader/>
    <HomeText/>
    <AlbumCards v-bind:emotes="emotes"/>
  </div>
</template>

<script>
// @ is an alias to /src
import HomeHeader from "@/components/home/HomeHeader";
import HomeText from "@/components/home/HomeText";
import AlbumCards from "@/components/home/AlbumCards";

export default {
  name: 'Home',
  components: {
    AlbumCards,
    HomeText,
    HomeHeader
  },
  data(){
    return {
      emotes: [
        {
          id: 0,
          name: 'Okayga',
          description: 'FeelsOkayMan + Pepega.',
          image: require('@/assets/images/Okayga.png'),
        },
        {
          id: 1,
          name: 'PeepoClown',
          description: 'Because twitch viewers are often clowns.',
          image: require('@/assets/images/PeepoClown.png'),
        },
        {
          id: 2,
          name: 'forsenCD',
          description: 'D OMEGALUL C emote.',
          image: require('@/assets/images/forsenCD.jpg'),
        },
      ],
    }
  }
}
```

```

    {
      id: 3,
      name: 'FeelsAmazingMan',
      description: 'When you are totally happy.',
      image: require('@/assets/images/FeelsAmazingMan.png'),
    },
    {
      id: 4,
      name: 'Pepega',
      description: 'Absolute retardness.',
      image: require('@/assets/images/Pepega.png'),
    },
    {
      id: 5,
      name: 'forsenE',
      description: 'The face of Twitch.',
      image: require('@/assets/images/forsenE.jpg'),
    },
    {
      id: 6,
      name: 'KKomrade',
      description: 'Fellow russians emote',
      image: require('@/assets/images/KKomrade.png'),
    },
    {
      id: 7,
      name: '5Head',
      description: 'Intellectual.',
      image: require('@/assets/images/5Head.png'),
    },
  ],
]
}
}
</script>

<style>

</style>

```

## Signin.vue

```

<template>
  <div class="text-center bg-dark">

**Вывод:** В результате выполнения работы были изучены основы разработки на языке JavaScript и разработки frontend-приложений в целом, в частности, с использованием клиентских фреймворков (Vue.js).
